In Collaboration with

- **Delhi Technological University, Delhi**
 - Indian Commerce Association, Delhi Chapter
- Society for Human Transformation and Research (SHTR), Delhi
- Divine International Group of Institutions, Gwalior, India
 - Rotary Club of Delhi Maurya, Delhi
 - Divine Education Trust

CALL FOR PAPERS

A report from the Internet and Mobile Association of India and market research firm IMRB International said that the overall Internet penetration in India in 2016 has been around 31%. Urban India with an estimated population of 444 million already has 269 million (60%) using the Internet. Rural India, with an estimated population of 906 million as per 2011 census, has only 163 million (17%) internet users. Thus, there are approximately 750 million potential users in rural India who are yet to become Internet users; if only they can be reached out properly. Contributing factors to this impediment are a lack of infrastructure & a need to improve Internet literacy.

To address these challenges, on 1 July 2015, India's Prime Minister Narendra Modi launched an ambitious and forward-thinking flagship program of Government of India called Digital India with a vision to transform India into a digitally empowered society and knowledge economy. Digital India seeks to expand India's digital infrastructure so that every citizen has access to the Internet and knows how to use it. A major part of the program is to connect rural areas to the Internet. Three core goals are: creating infrastructure, delivering services digitally and increasing digital literacy.

Digital India aims to provide the much needed thrust to the nine pillars of growth areas, namely Broadband Highways, Universal Access to Mobile Connectivity, Public Internet Access Programme, e-Governance: Reforming Government through Technology, e-Kranti - Electronic Delivery of Services, Information for All, Electronics Manufacturing, IT for Jobs and Early Harvest Programmes.

All the elements are in place for India to become a global leader in Digital Revolution- telecom network becoming more and more competitive by the day (thanks to the Indian 'start-up' JIO), cost of mobile handsets going down with some major international and domestic players penetrating tier I and tier II cities, Wi-Fi network available at public spots like airports, railways stations, bus stands, shopping malls and restaurants and lastly the insatiable appetite for digital services provided by the series of successful Indian-grown-foreign-funded internet start-ups, right from buying hair pins to booking a table at a restaurant.

With the Demonetization Scheme giving impetus to the digital payment companies, it has not only solved the credit money crisis for Indian retail start-ups but also opened new avenues of marketing for Indian SMEs with brick & mortar setups.

SUBMISSION GUIDELINES

- Researchers and Practitioners can submit their Papers exclusively on central theme and also they can submit papers specific to the track.
- The Abstracts should be no more than 250 words with Purpose, Methodology, Findings, Research Limitations, Practical Implications, Originality/ Value, and Key Words (maximum 5).
- The particulars regarding the title of the paper and author(s)'s name(s), designation(s), official address(es), phone/fax number(s) and e-mail address(es) should also be mentioned along with the abstract on a separate sheet for blind peer review.
- Papers should not exceed 10,000 words in length (all inclusive) with an abstract of no more than 250 words.
